Applications setting (Example Skype)

The screenshot shows the Skype application interface. At the top, the menu bar includes 'Skype', 'Contacts', 'Conversation', 'Call', 'View', 'Tools', and 'Help'. Below the menu bar, the title bar reads 'Skype™ - Options'. On the left side, there is a sidebar with several menu items: 'General', 'General settings', 'Audio settings', 'Sounds', 'Video settings', and 'Skype Translator'. The 'Audio settings' item is highlighted with a blue background and is annotated with 'step 2'. The main content area is titled 'Audio settings: Set up sound on your computer'. It contains two sections: 'Microphone' and 'Speakers'. The 'Microphone' section has a dropdown menu set to 'Microphone (Sandberg 126-40)', a volume slider, and a checked checkbox for 'Automatically adjust microphone settings'. This section is annotated with 'step 3'. The 'Speakers' section has a dropdown menu set to 'Speakers (Realtek High Definition Audio)', a volume slider, and a checked checkbox for 'Automatically adjust speaker settings'. A blue arrow points from the 'Tools' menu item to the 'Audio settings' sidebar item, and another blue arrow points from the 'Microphone' dropdown menu to the 'Speakers' dropdown menu.
